Detailed Project Description and Justification:

The continued grading and snow plowing over the years have worn down community roads in Larsen Bay to an extent that the subbase course (non-frost susceptible material) and base course may need to be replaced. Additional D-1 for the surface course will also be needed, compacted and recrowned. This effort has not been done for 10 years and in places is gone. Road drainage will also be addressed. The maintenance of the roads in Larsen Bay is a City responsibility.
